Forecast for Tuesday 21 Feb 2023

Weather: Cloudy at first on Tuesday with patchy light rain, mainly over Southeast Highlands. Rain mostly dying out, just the odd patch of drizzle remaining, otherwise dry with bright spells developing and some afternoon sunshine, especially over eastern Cairngorms and Aberdeenshire hills. Outbreaks of rain and summit snow will spread into the southwest late in the evening.

Chance of cloud-free hill tops above 800m: 60% best chances in north of area.

Low Cloud and visibility: Extensive fog above about 600 to 700m overnight and lingering in southwest of area during the morning. Misty conditions beneath the cloud and poor visibility in rain. Mostly good visibility developing during morning with clouds becoming well broken in north of area.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Note although mild at lower levels, it will still feel bitterly cold over higher ridges/summits due to strong winds and temperatures only a few degrees above freezing.

Forecast for Wednesday 22 Feb 2023

Weather: Overnight rain and snow clearing during the morning then drier, brighter for a time. Showers following, especially to more northern ranges, falling as snow above about 600m.

Maximum wind: Strengthening northwesterly winds, average speeds of 30mph increasing 40mph with gusts 60mph.

Chance of cloud-free hill tops above 800m: 20% improving 40% by afternoon, best chances in south of area.

Low Cloud and visibility: Visibility will be poor in early rain and snow and in passing wintry showers, otherwise good beneath the clouds. Extensive cloud cover about 600m at first and as showers pass by, otherwise good cloud breaks developing.

Temperature: **Glens:** Plus 7 Celsius.
At 800m: Plus 3 Celsius falling to minus 2 Celsius in afternoon.
Freezing level: 1000m lowering to 700m in afternoon.
